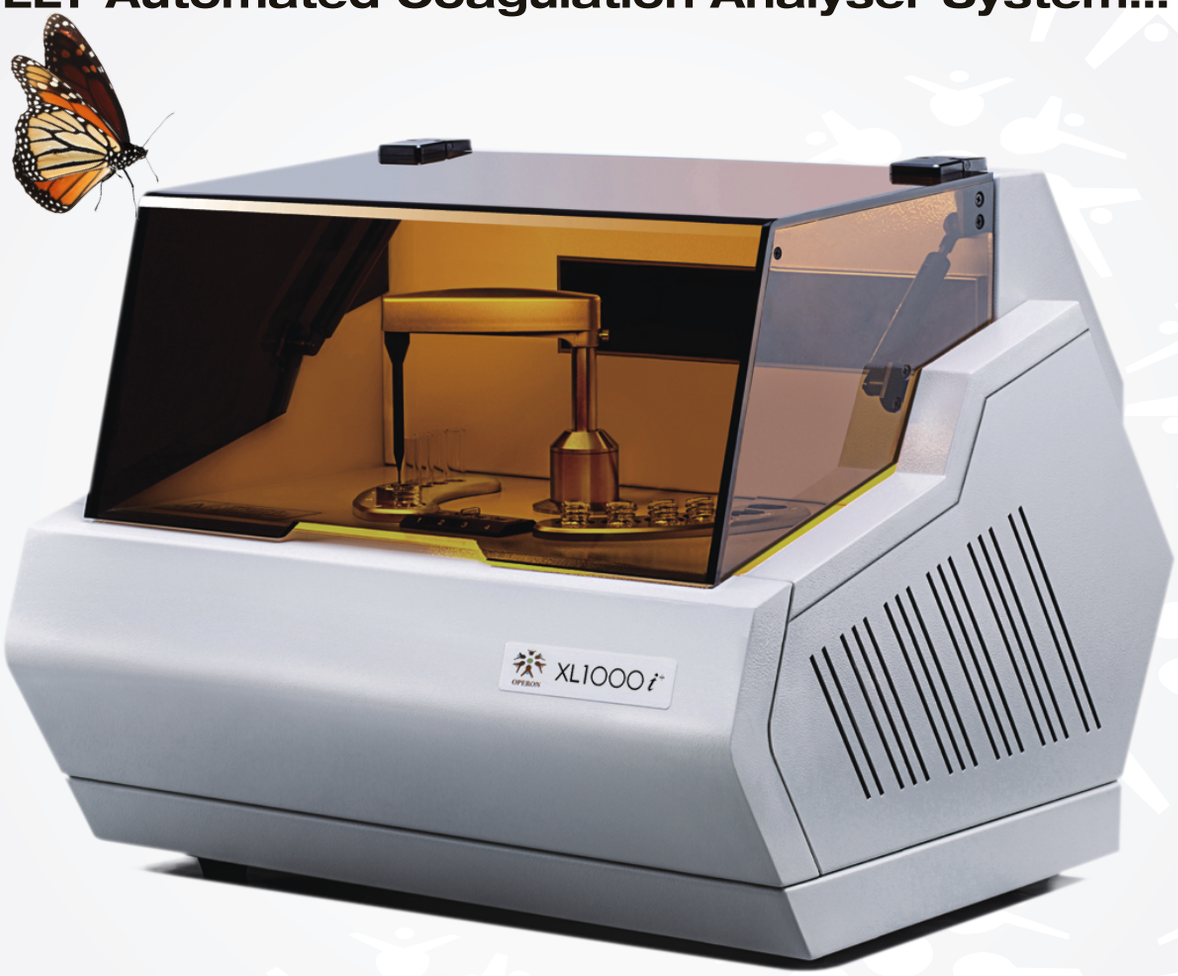
OPERON®

XL1000i+

The MOST Affordable, Compact FULLY Automated Coagulation Analyser System...



Finally, Coagulation testing is no more a difficult task with Operon XL-1000i – Fully Automated Coagulation Analyzer.

A compact benchtop model, designed to do your routine PT, PTT, Fib and TT with ease and accommodate special investigations like Factor assays, D-Dimer testing etc… Without a Flinch.

With Onboard cooling system, Low working cost, collision protection probe and automatic level sensing, it's surely going to be a buzzword in Haemostasis testing.

All these features @ very very low cost. Truly, Technology made so very much affordable.

Please welcome Operon XL 1000i+
Fully Automated Blood Coagulation Analyzer

Huaguang certification

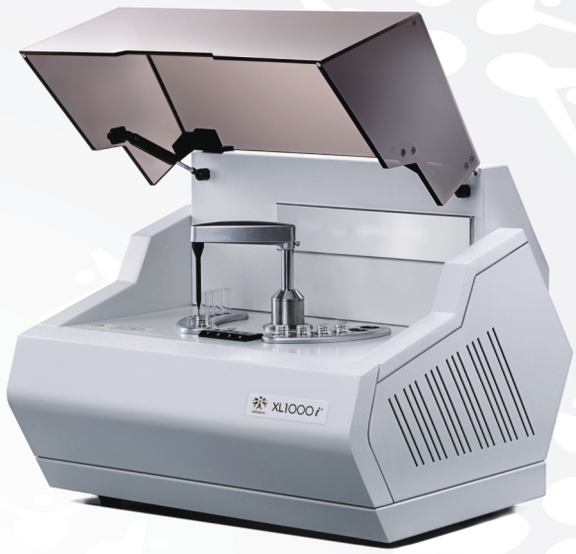
Germany TUV certification

CE certification

Model: Zonci Xl-1000i+

OPERON®

XL 1000i+



Features:

Test Parameters:
PT/INR
APTT
FIB
TT
Factor Assays
D-Dimer
Four Channel with Advanced Optics,
Nephlometery and Turbidimetery Technologies
Automatic /Manual Calibration Function.
Built IN Refrigeration for reagents.
Level Sensing Probe.
Abnormal test results alarm and automatic retest function.
Test Speed: 120 Test/hour.
Units: Seconds, INR, %, g/L.

Technical Specifications

Power Supply	AC 100~240V. 50/60 Hz
Working Environment	Temperature 10°C~30°C
Relative Humidity	≤70%
Atmospheric pressure	86.0kPa~106.0kPa

Repeatability	Regular Plasma	Abnormal Plasma
PT (sec)	≤3%	≤8%
APTT (sec)	≤4%	≤8%
Fib (sec)	≤8%	≤15%
TT (sec)	≤10%	≤15%

- Testing Parameters : PT, APTT, TT, FIB, D-Dimer etc..
- Prothrombin time (PT) : Time (s): percent of activity : Ratio of PT : INR
- Sample Position : 5 Primary tubes or Aliquots
- Reagent : There are 5 cooling positions for reagent.
- Dilutor Precision : 500ul micro-syringe ≤2%
- Cleaning position : 1
- Pre-heating position : 4
- Testing position : 4
- Dimension : 510mm*370mm*350mm
- Weight : 20kg
